Some of our specialties at one glance:

Anobilis

A particular elegance and extravagance. This ASANUS Anobilis product line makes it possible for us to offer you extremely precise micro-instruments whose functionality and handling are geared to your needs. Due to their High-Tec specifications, the instruments are highly reliable in terms of functionality and lifetime.

Please ask for our Anobilis Catalogue for detailed information.

Blue Line

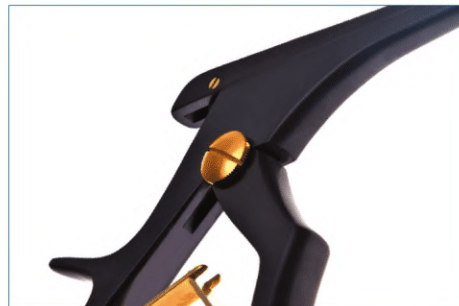

Hallmarks of the Blue Line Titan instruments are their precise workmanship and low weight, which means fatigue-free and highly precise work. Their anti-magnetic property makes it possible to stitch with micro-needles without any magnetic influence. The superior "diamond dusted" coating of the jaw enables a gentle and atraumatic grasp of suture needles. The forceps are soft and elastic. It enable very fine non-traumatic grip of delicate vessels.

Black Line punches

Hallmarks of the Black Line punches are their superior, ceramic finishing of the surface material which offer you the following benefits:

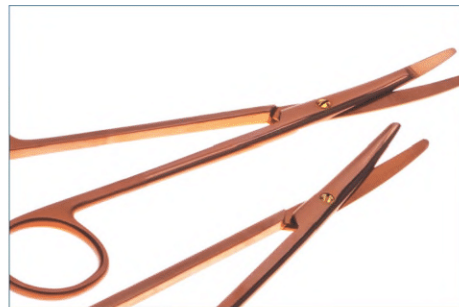

- glare-free
- high cutting service life
- chrome allergy-free
- highly precise workmanship
- solvent resistance
- corrosion-free, high oxidation resistance
- available with a 10-mm or 15-mm stroke
- ergonomically formed handle to make work more pleasant

TITANIT®

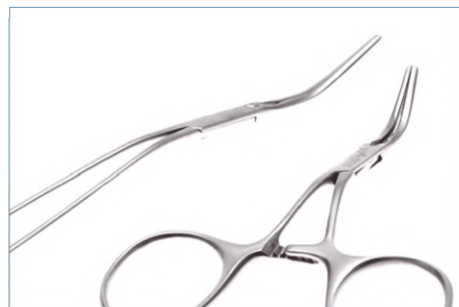

The TITANIT® instruments are based on a new production technology with innovative and economical features. The instruments are extremely hard, well above usual standards and have an extremely high cutting quality.

For our TITANIT® instruments we provide a five-year cutting guarantee if used properly. These are also able to be used for cutting threads.

FINE Line hemostats

Due to their ergonomic design and highly precise workmanship. All FINE Line hemostats allow the user to work comfortably and safely. Their low weight makes it possible for the surgeon to work fatigue-free and easily even during long operations. Especially for very fine vessels, these clamps are often used.

ULTRA-CUT® scissors

ULTRA-CUT scissors have extremely hard and durable blades with extremely sharp scalpel-like micro-grinding, which guarantees you a smooth, clear and very fine cut. The ASANUS ULTRA-CUT scissors are ideal for extreme performance coupled with the highest standards of cutting. Additionally, the ULTRA-CUT scissors have an anti-slip grip part, which prevents slipping during use and ensures safe cutting in difficult situations.
